ICWE2008 invites original submissions in the following categories: research papers, industrial papers, demonstrations, workshops, PhD student papers, and tutorials. The submissions may cover new approaches, viewpoints, challenges, and visions on any aspect of Web Engineering, report on the implementation or deployment of advanced Web projects in an industrial or application scenario, or describe Web Engineering education experiences.

Important Dates
Submission of papers:
February 22, 2008
Submission of Workshop papers:
April 14, 2008

ICWE 2008

International Conference On Web Engineering

Yorktown Heights, New York, July 14-18, 2008

TOPICS

ORGANISATION

General Chair
Paul Dantzig, IBM Research, USA
Program Chairs
Daniel Schwabe, PUC-Rio, Brazil
Francisco Curbera, IBM Research, USA
Doctoral Consortium Chair
Emilia Mendes,
University of Auckland, New Zealand
Workshop Chairs
Martin Gaedke, Chemnitz University of Technology, Germany
Maria Bielikova, Slovak University of Technology, Slovakia

Posters Chair
Michael Grossniklaus,
ETH Zürich, Switzerland
Demo Chair
Silvia Abrahão, Universidad Politécnica de Valencia, Spain
Tutorial Chair
Bebo White, SLAC, USA
ISWE Liaison
Martin Gaedke, Chemnitz University of Technology, Germany
IW3C2 Liaison
Bebo White, SLAC, USA

Web application development
Collaborative Web application development
Design models and methods
Programming models for Web application development
Component-based Web Engineering
Web services-based applications
Service discovery and choreography
Web architectures and application frameworks
Infrastructure and models for service delivery over the Web
Web centric architectures for enterprise computing
Rich Internet Applications
Semantic Web Engineering Hypertext models and their application on the Web
Reuse and integration
Web design patterns and pattern mining
Engineering approaches to Semantic Web applications
Web content management
Engineering of Semantic Web services
Adaptive Web applications
Web quality and Web metrics
Testing and evaluation of Web systems and applications
Web usability and accessibility
Deployment of Web applications
Performance modeling, monitoring and evaluation
Localization and internationalization of Web applications
Mobile Web application development and Device-independent Web delivery
Domain-specific approaches for Web-based applications and solutions
Web-based Workflows and collaborative Web Applications
Web personalization
Social Web applications
Mobile Web applications
Empirical Web Engineering

Endorsed by
